

## FIRST STATE BANK PARKERSBURG, IOWA

**Location:** Parkersburg, IA

**End Date:** April 30, 2005

**Project Size:** 7,400 SF

**Budget:** \$1,300,000

### Project Description:

This new bank facility is located just east of the former bank site. Situated on a site with over five hundred feet of highway frontage, the new 7,400 square foot building provides increased lobby, office and community room space.

In addition to providing two drive-up banking lanes and a drive-up ATM lane, the new building features a large central banking lobby with sloped ceilings and indirect lighting. Private offices border the lobby on the east and south with a board room to the west. A large community room has also been incorporated into the design.

Brick and local Iowa limestone were used on the exterior..
