

ACTORS THEATER AMES, IOWA

Location: Ames, IA

End Date: Summer 2021

Project Size: 2,200 sq. ft.

Budget: N/A

Project Description:

We at RMH are proud to be a part of bringing a new life to the entrance of the Actors Theater in Ames. The project's focus was bringing an updated front facade to the building and expanding the interior space. Developing a main entry vestibule allowed for expanding the boardroom within the existing building home to exciting gatherings.

Actors is a staple in the local community, and we were beyond excited to partner with them and Integrity Construction to develop this project. Creating a delightful interior space and a new facade brought to life a lively space providing wonderful shows year-round.

An attractive color scheme and varying material choices created a thriving new entryway to attract guests to performances held within the space. An open-plan boardroom with lots of natural light, room for social space, and a bar top space frames an exciting atmosphere around performance times.
