

IOWA DERMATOLOGY AMES, IOWA

Location: Ames, IA

End Date: Summer 2021

Project Size: 2,325 sq. ft.

Budget: N/A

Project Description:

Iowa Dermatology Consultants has moved into their new home on Boston Ave. in Ames. At 2,325 sq. ft., the space houses all parts of the dermatology practice, including areas for procedures, exam rooms, and operations spaces.

This building is highlighted by a welcoming reception area that leads into the nursing station, which is flooded with natural light from clerestory windows in the vaulted space above. This provides a comfortable atmosphere for staff and patients maneuvering throughout the space.

Meetings with the client that utilized 3D rendering visualization and plan reviews allowed for carefully creating a space tailored to their needs. Thoughtful discussions throughout the process formed a successful project that fits into neighboring projects in the area we have worked on at RMH.
