

## ON TRACK CONSTRUCTION NEVADA, IOWA

Location: Nevada, IA

End Date: April, 2022

Project Size: 15,657 SF

Budget: N/A

### Project Description:

On Track Construction required a new office building in Nevada, Iowa. Working with local general contractor Woodruff Construction, RMH Architects was charged with designing a modern facility to house their equipment and operations staff.

This multi-story, 15,657-square-foot building combines a pre-engineered metal building with a more traditional steel framed enclosure housing staffing offices, meeting spaces, and storage/maintenance spaces for all their equipment.

Located in the west industrial area of Nevada, off Highway 30, provides an ideal space for easy access to and from the facility.
